

Create A Duotone

Open a new document in Photoshop

4.25 by 7 inches

300 dpi

RGB mode

Transparency checked

Go to image mode and change the RGB to Grayscale

Say yes to discard all color information

Click on the gradient tool and drag a line diagonally across your document

Go to image mode and change the mode to Duotone

Change the Type from Monotone to Duotone

Ink one should be black

Ink two should be Pantone 185. You get this by clicking in the second box to the right of Ink 2. It is the box without the line through it.

When the color dialogue box pops up just type the number 185 and it will select Pantone 185 for you. Click okay.
